

## JMIF delegation visits Türkiye for the fact-finding mission

JMIF organized the fact-finding mission for Türkiye to collect information on legal metrology system and the latest economic/business/investment trends. The delegation, which comprised 6 JMIF members and was held for the first time in three years, was sent from October 8-15, 2022.

In Türkiye, the delegates visited the Ministry of Industry and Technology and Turkish Standards Institute (TSE) in Ankara to learn about the legal metrology system.

In Istanbul, the delegation members had to manage a busy schedule: visits to JETRO Istanbul, the Turkish Investment Office, BAYKON, a weighing instrument manufacturer; TÜBİTAK UME, the Turkish National Metrology Institute; IHI Dalgakiran and KİWA BELGELENDİRME HİZMETLERİ A.Ş.

TÜBİTAK UME gave the detailed presentations of their latest research developments and the laboratory tour. BAYKON showed us how they made progress to be a leading company in Türkiye. Also, the executive and young staff members gave the delegation a factory tour.

IHI Dalgakiran, a joint venture established by IHI Corporation and Dalgakiran Kompresör, explained the outline of the company including Turkish business customs.

KİWA BELGELENDİRME HİZMETLERİ A.Ş, which is a notified body as well as a calibration laboratory, shared their activities as a notified body with a laboratory tour.

All the visits were warmly welcomed, and the mission was successful.
